

8th September 2020

TO WHOM IT MAY CONCERN

OPEN LETTER OF REFERENCE – Nigel Trasler

I had the pleasure of working with Nigel Trasler between September 2018 – July 2020 at the '125 Deansgate' Development, a £50m new build office in central Manchester. He worked for Structal U.K Limited, who were responsible for the £10m+ façade package. This package comprised of a modified unitised frame clad externally with a heavily profiled natural terracotta panel, low level curtain walling and external doors.

Nigel worked as the Senior Projects Manager and provided oversight and direction to the site-based installation team, whilst managing the interaction between the Main Contractor and the Structal U.K Limited design office. Nigel also assumed responsibility for the installation programme and importantly engendered a safety and quality conscious ethos within his site operations team.

I found Nigel to be very knowledgeable of the products being installed and I accompanied him on a number of trips to the production facility in France. Whilst in France, it became clear he had a sound knowledge of the quality procedures within the manufacturing process. He was also able to offer advice on all aspects of what was a technically challenging project.

I found Nigel to be an honest, likeable and hardworking professional and would have no hesitation in recommending Nigel for any senior management role within the façade industry.

Yours faithfully

**Mr Paul McCormick
Managing Director**
